

A Dog's Breakfast

You need a calculator

Activity

Jamie helps out at the Top Dog boarding kennels. This afternoon, he is organising meals for the next 2 days for the 6 dogs at the kennels:

Jamie sorts out the right amount of food for each dog and puts it into bags, ready for the staff to give out at mealtimes. He uses these guidelines to help him work out the amounts:

Daily food allowance			
Dog size	Small (under 10 kg)	Medium (10 kg – 25 kg)	Large (over 25 kg)
Amount	4% of body weight	3% of body weight	2% of body weight

- How many bags of dog food does Jamie need to get ready?
- Make a chart that shows how much food should be given to each dog at each mealtime. (Round amounts to the nearest 10 grams.)
